

Al crear el modulo con el scaffold nos crea esta plantilla.

```
root@debian:/home/john/odoo-modulos/addons/modul_jonathan# ls
controllers demo __init__.py __manifest__.py models security views
root@debian:/home/john/odoo-modulos/addons/modul_jonathan# _
```

luego ejecutamos el comando systemctl restart odoo y refrescamos la página de nuestro navegador.

The image shows a screenshot of the Odoo module manager interface on the left, listing several modules. A red arrow points to the 'modul\_odoo' module, which is marked as 'Instalado'. Overlaid on the right is a terminal window showing the XML code for the 'venda\_component' module. The code defines two views: 'venda\_component.view\_form' and 'venda\_component.view\_tree'. The terminal output also shows the command 'systemctl restart odoo' being executed.

```
<?xml version="1.0" encoding="utf-8" ?>
<odoo>
</odoo>
<record id="venda_component.view_form" model="ir.ui.view">
  <field name="name">venda.component.view.form</field>
  <field name="model">venda.component</field>
  <field name="type">form</field>
  <field name="arch" type="xml">
    <search>
      <field name="name"></field>
    </search>
    <form string="Formulário de venda">
      <group colspan="2" cols="2">
        <field name="name"></field>
        <field name="marca"></field>
        <field name="color"></field>
        <field name="is_offer"></field>
      </group>
    </form>
  </field>
</record>
<record id="venda_component.view_tree" model="ir.ui.view">
  <field name="name">venda.component.view.tree</field>
  <field name="model">venda.component</field>
  <field name="arch" type="xml">
    <tree string="Tree component">
      <field name="name"></field>
      <field name="marca"></field>
      <field name="color"></field>
      <field name="is_offer"></field>
    </tree>
  </field>
</record>
</odoo>
```

Hemos creado nuestro producto venta\_component.py algo importante es que pongo mi imagen para verificación de mi autenticidad en mi trabajo y que esto no es una copia

The image shows a screenshot of the Odoo 'Ajustes' (Settings) page on the left, under the 'Modelos' (Models) section. A red arrow points to the 'venda.component' model. Overlaid on the right is a terminal window showing the XML code for the 'venda\_component' module, identical to the one in the previous image. The terminal output also shows the command 'systemctl restart odoo' being executed.

```
<?xml version="1.0" encoding="utf-8" ?>
<odoo>
</odoo>
<record id="venda_component.view_form" model="ir.ui.view">
  <field name="name">venda.component.view.form</field>
  <field name="model">venda.component</field>
  <field name="type">form</field>
  <field name="arch" type="xml">
    <search>
      <field name="name"></field>
    </search>
    <form string="Formulário de venda">
      <group colspan="2" cols="2">
        <field name="name"></field>
        <field name="marca"></field>
        <field name="color"></field>
        <field name="is_offer"></field>
      </group>
    </form>
  </field>
</record>
<record id="venda_component.view_tree" model="ir.ui.view">
  <field name="name">venda.component.view.tree</field>
  <field name="model">venda.component</field>
  <field name="arch" type="xml">
    <tree string="Tree component">
      <field name="name"></field>
      <field name="marca"></field>
      <field name="color"></field>
      <field name="is_offer"></field>
    </tree>
  </field>
</record>
</odoo>
```
